SUMMARY

Backend Engineer with 3+ years of software engineering experience, working on cloud-based enterprise systems, APIs, distributed services, and observability. Experienced with Go, REST APIs, microservices, AWS, Kafka, PostgreSQL, Redis, Docker, and Kubernetes. Focused on building reliable backend systems, improving system performance, and debugging production issues.

WORK HISTORY

Associate Software Engineer, MAERSK, Bengaluru, India **Oct 2023 — Present**

- Built backend services for a global RDT Scanner platform used across **50+ countries** for warehouse and logistics operations.
- Designed and optimized REST APIs and event-driven workflows using AWS services including **ECS, Lambda, DynamoDB, Kafka, and SQS**.
- Developed observability and telemetry SDKs for backend, web, and mobile applications to support centralized logging, monitoring, and performance tracking.
- Contributed to distributed systems with a focus on scalability, reliability, and production debugging.
- Added automated unit and integration testing and contributed to CI/CD pipelines, code reviews, and production release processes.
- Collaborated with engineering and product teams to deliver enterprise solutions for **global customers, including Nike, Adidas, Amazon, and other leading brands**.
- Mentored developers through architecture reviews and technical sessions; received a **Spot Award in Q1 2026**.

Software Engineer Intern, MAERSK, Bengaluru, India **Jan 2023 — Sep 2023**

- Developed features for enterprise logistics platforms, including AMS, GMS, DKMS, and YMS.
- Contributed to microservice-based applications through feature development, debugging, testing, and code reviews.
- Built reusable components for logistics automation workflows and contributed to dock assignment functionality.
- Received **Star of the Quarter** award in Q3 2023.

Mobile Engineer, Green Apex Solutions Limited, Ahmedabad, India **Jun 2022 — Nov 2022**

- Built production grade cross-platform mobile applications with real-time communication, developing reusable SDKs and plugins and integrating native Android and iOS functionality.

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidyalaya (R.G.P.V), Bhopal, Madhya Pradesh - *B.Tech, Computer Science Engineering - (GPA: 8.2)* **Jul 2019 — Jun 2023**

PROJECTS

AlgoPatterns | Go, Gin, CockroachDB, Redis, Docker, Link

- Built a Go backend for an algorithm learning platform using **Gin and Clean Architecture**, with separate handler, service, and repository layers.
- Developed versioned REST APIs for authentication, problems, patterns, and code submissions using **JWT authentication**.
- Integrated **Judge0** for sandboxed code execution and built submission orchestration with retries and result polling.
- Implemented **rate limiting, request validation, structured logging, health checks, graceful shutdown, and database migrations**.
- Used CockroachDB with **pgx connection pooling** and Redis for the code execution infrastructure.
- Containerized the backend with Docker and configured Kubernetes-compatible health probes and GitHub Actions CI/CD.

SKILLS

Programming Languages	:	Go (Golang), Java, Python, SQL
Backend	:	REST APIs, gRPC, Microservices, Distributed Systems, Event-Driven Architecture, System Design, Concurrency, Apache Kafka, AWS SQS
Go	:	Gin, pgx, JWT, Clean Architecture, Dependency Injection, Repository Pattern
Databases	:	PostgreSQL, DynamoDB, Redis, Valkey, CockroachDB
Cloud	:	AWS, Lambda, AWS ECS, EC2, API Gateway, ECR, CloudWatch
DevOps	:	Docker, Kubernetes, CI/CD, GitHub Actions, Git, SonarQube
Testing & Observability	:	Unit Testing, Integration Testing, Playwright, Structured Logging, Grafana, Prometheus
